PMI-ACP preparation and certification

ALL-IN-ONE: EXAM INCLUDED IN PRICE   5 days (35 hours)

Presentation

This course will give you every chance of passing the PMI-ACP certification. This recognized and much sought-after qualification will prove to your peers your skills in agile project management. This certification is one of the only ones to offer training in a wide range of agile methods, including Scrum, Crystal, DSDM, XP and Kanban. At the end of this training, you'll know which approaches, tools or techniques are best suited to your situation. Agility has become indispensable for many companies.

However, few professionals are able to properly apply and understand the agile philosophy. Agile methods help improve productivity and customer satisfaction. That's why they're in such demand. After completing our preparation course, you will be able to take the certification exam free of charge.

Objectives

- Discern your managerial posture from that of an agile manager
- Describe, illustrate and put into practice the skills of the agile manager.
- Discover and integrate simple, practical tools for humane, caring and effective management.
- Transform failures into learning and gain confidence
- Guide employees towards collective success

Target audience

- Project managers
- Future agile managers
- Scrum Master

Prerequisites

Proven experience of working in project mode.

- Continuous improvement approaches applied to processes

Value management

- Maximizing business value

PMI-ACP exam training

- Answers and comments

Companies concerned

This course is aimed at both individuals and companies, large or small, wishing to train their teams in a new advanced IT technology, or to acquire specific business knowledge or modern methods.

Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire which enables us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives for the forthcoming course, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

Teaching methods

Practical course: 60% Practical, 40% Theory. Training material distributed in digital format to all participants.

Organization

The course alternates theoretical input from the trainer, supported by examples, with brainstorming sessions and group work.

Validation

At the end of the session, a multiple-choice questionnaire verifies the correct acquisition of skills.

Certification

A certificate will be awarded to each trainee who has completed the entire course.
