# Acculturation to the challenges of generative AI

0.5 days (3h30)

## Presentation

Our acculturation training on the challenges of Generative AI and no-code will give you a considerable competitive edge. Automation and generation will boost your productivity tenfold.

During this workshop, we'll introduce you to the most popular AI content generation tools: ChatGPT for copywriting, image creation and no-code.

We'll also teach you how to automate your digital communication processes (via [APIs](#) or customized workflows).

In addition, you'll learn about the different aspects of artificial intelligence: its benefits and constraints. At the end of this course, you'll be able to generate images and textual content, whether in response to messages or to create articles relevant to your audience.

This course will be run on the latest version of Chatgpt, [ChatGPT-4o](#).

## Objectives

- Understand the fundamentals of artificial intelligence
- Learn how to use ChatGPT

## Target audience

- Communication managers
- Marketing manager

- Digital marketing manager
- Company managers
- Project managers
- Managers

## Prerequisites

It is necessary to have the paid version of ChatGPT and to make an initial payment (of at least \$5) to the OpenAI API account.

## Program of our acculturation workshop on the challenges of Generative AI

### Introduction to Artificial Intelligence

- What is artificial intelligence?
- Deep and machine learning
- Generative AI

### Focus on Generative AI

- Overview of different models
- Focus on OpenAI services
- What's new in GPT4-o
- The limits of generative AI

### Prompting basics

- Prompting best practices for text generation
- Best practice prompts for code generation
- Prompting best practices for image generation

### Integrating generative AI into your business

- Risks to avoid
- Fine-tuning
- Using APIs to automate processes

## Companies concerned

This training course is aimed at both individuals and companies, large or small, wishing to train their teams in a new, advanced IT technology, or to acquire specific business knowledge or modern methods.

acquire specific business knowledge or modern methods.

## Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire which enables us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives for the forthcoming course, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

## Teaching methods

Practical training: 60% hands-on, 40% theory. Training material distributed in digital format to all participants.

## Organization

The course alternates theoretical input from the trainer, supported by examples, with brainstorming sessions and group work.

## Validation

At the end of the session, a multiple-choice questionnaire is used to check that skills have been correctly acquired.

## Certification

A certificate will be awarded to each trainee who completes the training course.
