# PMP® 2024 Training with Certification

All-In-One: Preparation & Exam included in the price

5 days (35 hours)

## Overview

The PMP® certification training prepares you to pass the written exam, which consists of multiple-choice questions on project management and is based on knowledge of the exam content outline (ECO), mainly from PMBOK v7, Agile Practice Guide, and other key resources cited by the PMI.

An integral part of the prerequisites for submitting an eligibility application, this PMP® certification training course enables anyone wishing to prepare for PMP® certification under the new 2024 program to master the PMI philosophy, while acquiring the techniques necessary to successfully complete projects using the classic, hybrid, or agile method.

Training led by a PMI-accredited trainer in accordance with its new program starting in 2024.

Like all our training courses, this one will introduce you to **the latest stable version** of the technology and its new features.

## Objectives

- Understand the structure and terminology used in the Project Management Body of Knowledge (PMBOK)
- Outline the knowledge and domains (People, Processes, and Business Environment) in project management, generally recognized as best practices
- Understand the tasks and drivers associated with each of the above domains
- Describe the project management life cycle and associated processes
- Present the professional responsibilities expected of a practitioner

- Prepare for the PMP® exam through a question bank inspired by actual exam questions

## Target audience

- Project managers
- Project managers
- Project team members

## Prerequisites

There are no prerequisites for this training. However, it is preferable that participants be familiar with project management or have worked in a project environment.

Note: Ambient IT does not own PMP®; this certification belongs to Project Management Institute®, Inc.

## Our PMP® 2024 Certification Preparation Training Program

### [Day 1]

#### General overview

- Presentation of the certification (eligibility requirements and maintaining certification)
- Presentation of the new exam structure
- Presentation of new features of the program (Exam Content Outline - ECO)

#### Creating a high-performance team

- Building a team
- Defining ground rules for the team
- Negotiate project agreements
- Empower team members and stakeholders
- Train team members and stakeholders
- Engage and support virtual teams
- Develop a shared understanding of the project

### [Day 2]

#### Start the project

- Determine the appropriate methodology/methods and practices for the project
- Plan and manage the scope
- Plan and manage the budget and resources
- Plan and manage the schedule
- Plan and manage the quality of products/deliverables
- Integrate project planning activities
- Plan and manage procurement
- Establish the project governance structure
- Plan and manage project/phase closure

## [Day 3]

### Do the work

- Assess and manage risks
- Execute the project to generate business value
- Manage communications
- Engage stakeholders
- Create project artifacts
- Manage project changes
- Manage project issues
- Ensure knowledge transfer to ensure project continuity

## [Day 4]

### Keep the team on track

- Lead a team
- Supporting team performance
- Overcome and eliminate obstacles, barriers, and roadblocks
- Managing conflicts
- Collaborating with stakeholders
- Act as a mentor to relevant stakeholders
- Using emotional intelligence to promote team performance

## [Day 5]

### Keep operations in mind

- Manage compliance requirements
- Evaluate and generate benefits and value with the project
- Assess and address changes in the internal and external business environment
- Support organizational change
- Use continuous process improvement PMP®

## CERTIFICATION

- Summary of PMI deliverables
- The code of ethics and professional conduct
- Tips for passing the PMP® exam
- The PMI PMP® exam
- The PMP® eligibility application
- The PDU system and maintaining PMP® certification
- Revision for the PMP® exam from day one to day last
- Taking the PMP® exam after training:
  - This PMP® certification exam consists of 180 questions and is a combination of multiple-choice, multiple-response, and reactive questions.
  - Total exam duration: 230 minutes.

## Companies concerned

This training is intended for both individuals and companies, large or small, wishing to train their teams in new advanced IT technology or to acquire specific professional knowledge or modern methods.

## Positioning at the start of training

The placement test at the start of the training course complies with Qualiopi quality criteria. Once they have finalized their registration, learners receive a self-assessment questionnaire that allows us to gauge their estimated level of proficiency in different types of technologies, as well as their expectations and personal goals for the upcoming training course, within the limits imposed by the selected format. This questionnaire also allows us to anticipate certain connection or internal security issues within the company (intra-company or virtual classroom) that could be problematic for the monitoring and smooth running of the training session.

## Teaching methods

Practical training: 60% practical, 40% theory. Training materials distributed in digital format to all participants.

## Organization

The course alternates between theoretical input from the trainer, supported by examples and reflection sessions, and group work.

## Assessment

At the end of the session, a multiple-choice questionnaire is used to verify that the skills have been correctly acquired.

## Certification

A certificate will be issued to each trainee who has completed the entire training course.
