PRINCE2 Practitioner Certification Training

ALL-IN-ONE: EXAMINATION INCLUDED IN PRICE

2 days (14 hours)

Presentation

Our PRINCE2® (PRojects IN Controlled Environments) certification preparation course will help you pass the exam without a hitch. PRINCE2 is a widely used international project management method, divided into 2 levels: foundation and practitioner.

The exam will require you to master the PRINCE concepts, which revolve around 3 axes: project control, management and organization. During certification, you will be introduced to a number of modules, including the seven themes, the seven processes and the seven principles governing project management.

Our "PRINCE2" certification preparation will review all the elements that are important for success on the exam. You'll deepen your understanding of the concepts covered in the Foundation exam, and learn advanced skills for implementing the method.

Throughout the course, your knowledge will be regularly tested with quizzes and practice exercises to familiarize you with the exam format. The course also includes group exercises and interactive sessions.

This PRINCE2 certification course will be presented in conjunction with the 7th edition of PRINCE2.

Objectives

- Obtain PRINCE2 practitioner certification
- Master the various PRINCE2 management components
- Mastering best practices for project execution

- Applying PRINCE2 concepts in your organization

Target audience

Companies concerned

This course is aimed at both individuals and companies, large or small, wishing to train their teams in a new advanced computer technology, or to acquire specific business knowledge or modern methods.

Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire enabling us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives with regard to the training to come, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

Teaching methods

Practical training: 60% Practical, 40% Theory. Training material distributed in

to all participants.

Organization

The course alternates theoretical input from the trainer, supported by examples, brainstorming sessions and group work.

Validation

At the end of the session, a multiple-choice questionnaire verifies the correct acquisition of skills.

Sanction

A certificate will be issued to each trainee who completes the course.
