Fortinet SD-WAN Training

4 days (28 hours)

Overview

In this course, you will learn about the most common SD-WAN deployment scenarios using Fortinet's Secure SD-WAN solution. You will explore various scenarios, from a single enterprise site to multi-data center environments, which will help you optimize and troubleshoot SD-WAN deployments.

Objectives

- Describe the capabilities of the Fortinet Secure SD-WAN solution
- Configure basic SD-WAN features
- Configure advanced SD-WAN features
- Understand the advanced dynamic routing capabilities of the Fortinet Secure SD-WAN solution
- Configure advanced VPN features of the Fortinet Secure SD-WAN solution
- Integrating the FortiOS SD-WAN solution with the FortiManager centralized management tool

Target Audience

- Technical Engineers

Prerequisites

- This training is open to anyone currently holding or aspiring to hold a technical position in the IT field

Fortinet SD-WAN Training Curriculum

1. Introduction
2. Centralized Management
3. Members, Zones, and Performance SLAs
4. Routing and Sessions
5. Rules
6. SD-WAN Overlay Design and Best Practices
7. Monitoring and

Fortimanager Training (EDU-NSE5)

Fortimail Training (EDU-NSE6)

FortiWeb Training (NSE6)

Target Audience

This training is intended for both individuals and companies, large or small, wishing to train their teams in new advanced IT technology or to acquire specific professional knowledge or modern methods.

Entry-Level Assessment

The pre-training assessment complies with Qualiopi quality standards. Upon final registration, the learner receives a self-assessment questionnaire that allows us to evaluate their estimated proficiency in various types of technologies, as well as their expectations and personal goals for the upcoming training, within the limits imposed by the selected format. This questionnaire also allows us to anticipate certain connection or internal security issues within the company (intra-company or virtual classroom) that could pose challenges for monitoring and ensuring the smooth running of the training session.

Teaching Methods

Practical Course: 60% Practical, 40% Theory. Training materials distributed in digital format to all participants.

Organization

The course alternates between theoretical input from the trainer, supported by examples and reflection sessions, and group work.

Assessment

At the end of the session, a multiple-choice questionnaire is used to verify that the skills have been properly acquired.

Certification

A certificate will be issued to each trainee who has completed the entire training program.
